Now that the Governor has put the state in Stage 2 and Canyon County is in the Red Zone I think it's time Southwest District Health steps up and mandates masks in Canyon county as well as Washington County. Any county in the Red should be required to wear masks not just recommended. Look at the science not who is going to get mad.

The UN is warning that the actions taken by every country around the world is going to result in a biblical famine next year.

[https://justthenews.com/politics-policy/coronavirus/un-food-group-warns-biblical-famines-2021?utm\\_source=justthenews.com&utm\\_medium=feed&utm\\_campaign=external-news-aggregators](https://justthenews.com/politics-policy/coronavirus/un-food-group-warns-biblical-famines-2021?utm_source=justthenews.com&utm_medium=feed&utm_campaign=external-news-aggregators)

You must stop reacting hysterically to a virus with a death rate of only 1% in Idaho and only 3% worldwide.

We are literally killing people in the name of saving people. It's dishonest and immoral.

Please be the voice of reason.

End the state of emergency. End all restrictions. Stop pushing people to wear masks. We have to reverse the panic and has been caused by government and media overreaction.

Marion Smith  
Nampa, Idaho

### Q1

#### Public Comment\*

I want it logged that I demand SWDH cease and desist any policies related to Covid-19 that were stated to “stop the spread, “slow the spread”, “flatten the curve”, etc.

These policies are unconstitutional and have failed miserably.

Currently the SWHD and any health department who continues to push these bumper sticker slogans is peddling fear and each member who has any part in perpetuating this farse should be held personally liable for the losses incurred by those who pay your salaries. Those persons who are party to these departments and committees who claim “I am just doing my job” while shackling the hands of citizens, stripping free Americans of their ability to live normally according their conscience, and remaining silent are complicit in increased incidences of neglect, depression, abuse, hunger, loss of dwelling, loss of wages, suicides, and any mental/ physical/ emotional assault taxpayers (HUMANS) endure! I’m pointing at you!

None of this is about health and you know it. If it was you would know these policies are completely useless. If it was about health you would encourage eating well, exercising, laughing, gathering with friends, hugging, hydrating, getting fresh air, etc. You have done none of these things.

I demand that all who are unelected (meaning we didn’t vote you in) go back to working WITHIN their scope of employment. Stop being puppets. Stop shoving your fellow citizens into cattle cars. Defend the Constitution and allow Idahoans to continue living their lives as they see fit for themselves... after all, you are not medical professionals and you certainly are not the physician to the thousands of Idahoans you are imposing your misguided instructions upon. Therefore, you have zero authority to prescribe the use of medical devices and zero ability to comprehend the health/ mental/ emotional/ financial needs of the individuals you are stomping on. Knock it off.

Please do not mandate the use of masks. We are all adults and 99% of the people, I see, are wearing masks as requested by retailers and other establishments. This illness has a 99% survival rate. It's time for herd immunity. Enough is enough of a few people deciding what's best for the majority. I appreciate that this isn't an easy thing to decide but we are already all doing our part. When will it stop? What about our mental health? What are the long term affects on our children? What about the people who've died because they are now afraid to go to the doctor or hospital? Please allow us our freedom of choice. We will self isolate as needed. Please do not mandate the wearing of masks. Thank you and happy Thanksgiving.

### Q1

#### Public Comment\*

Thank you for all you do for our county. I am sure it is even more challenging during this roller coaster of a year. I am writing to request that you not attempt a mask mandate or further enforce any demand or blanket requirements on our community. People are struggling financially, emotionally and socially. Our county is devastated by the crisis (the crisis of fear in people), there are hostile mask wearers screaming at women and children, there are angry employees who have no idea why they are demanding things of patrons. Our society is angry and upset enough. People are afraid because of the public officials comments, news comments and exacerbated fear spread across social media and political and outlets- not because they would have otherwise feared a virus. We all have the ability to visit a doctor if we need medical advice. We can all see that the number of listed positive and probable are going up in the communities that are charged with a mask mandate, this is not coincidence, the masks are dirty and a germ magnets (for most who wear them as they are not handled or cleaned properly) the masks hold any germ you come in contact with to your mouth and nose- this is gross. The masks are not the answer. Just as our Pilgrim settlers who were infected with illness shortly after their arrival, most of us will get sick and most of us will recover, and as with most virus and illness there will be the tragedy of loss, but there is never a government or government regulated entity that is going to heal or stop sickness; To think this is so is just ignorance. We need to be free, free to seek (and take or not)our own personal medical advice as we see fit, and nobody should be angry or judgmental of our personal choice. The best advice anyone can be given is to stay home if sick, or with a fever, and wash your hands with soap. Anything else is just controlling and absurd. I ask of you to leave your recommendations as such and provide this simple guidance only. We are in the annual Flu season and our community needs to understand that not all sneezes and flu aches are Covid. We need to help the community around us be accepting of others, to be reasonable in understanding that it is ok to be sick, it is normal and that is part of our living. Please encourage people to live life. Hiding and living in fear is killing more people than any virus. Another note I would like to bring attention to is that there are in fact many, many reasons that person cannot or should not wear a mask; the obvious is medical freedom of choice, religious freedom of choice, deaf or hard of hearing, asthma, COPD, PTSD, rape, masked robbery, masked abusers, being masked as a victim of any trauma, abduction, forced trauma of any kind, service men and women have traumas we could never understand and so many more. In conclusion I request of you to decline any mask mandate or further shut down of our community.

## Q1

Public Comment\*

I view the Southwest District Health Board as the "parent" of six "children" (counties) of whom they are in charge of keeping safe and healthy, by making sure as a parent, that they do what is necessary whether their children like it or not, to accomplish that very important goal of keeping them healthy. As parents, we are not there to be our children's "friends." We don't let our children run around with scissors. We put them in car seats. We have them "buckle up." We have them wear coats when it is cold.

Now we have a pandemic crises and what is our "parent" (SWDH) doing to protect their children? We have heard it over and over-- wear a mask, socially distance, etc. until we are blue in the face. The governor has said it and has left it up to the health districts to do their job as a parent, but our health district seems to want to "be their friend" rather than take care of their "children." Our health district is not taking care of its "children." It is letting the loud minority throw a tantrum and the district doesn't want to deal with it, so they cajole them and give in to them.

I don't come to speak prior to the meeting as allowed because these naughty children are bullies and organized and cram into the room without masks and it is an unsafe environment during this pandemic. We have seen what the flood of education has accomplished--NOTHING! The numbers keep rising and we are over the top with confirmed cases of COVID 19. Now is the time to be the parent you need to be!

Adopt a mask mandate according the spread of disease numbers in our counties. Not everyone needs it at the same time, but to reduce the spread, incorporate it in the levels of spread. Be the parent I know you can be. We need you to do this for our families, friends and ourselves. If you can help reduce the spread and hold it down until a vaccine is available, you have done your job. You are a HEALTH DISTRICT, an overseer of the health of six counties! This is not political. This is HEALTH for all. HELP! HELP! HELP!

### Q1

#### Public Comment\*

Every medical professional in Idaho and our country, versed in public health, is imploring us to mandate masks. If a mask mandate is in place, with enforcement that sanctions businesses and venues who refuse to enforce it, it will work. Oregon has had almost universal compliance except in the Eastern part. My father in law, a healthy man with no underlying vulnerabilities, contracted Covid after exposure AT CHURCH, and nearly died. He traveled from Nampa cross country to NC before he knew he was sick. What started feeling like allergies, resulted in 15% lung capacity and a 10 day ICU stay. He is home now but on supplemental oxygen and still struggling. Who knows how many he exposed between here and NC. You have shown an extraordinary lack of political courage. You are all we have to appeal to. It is your only job. So few mayors and commissioners and council members possess spines, we are forced to rely on you. Dear Jesus, please, understand that mask wearers who do it because they have enough snap to know it is the right thing, are not going to riot or break doors or act like selfish asses. But that seems to be the behavior that gets rewarded. You have rewarded it to the peril of our communities. Get it right!

For anyone who doesn't think wearing a mask can't help... have you ever worn a face shield? When and if you want to experiment with this... put it in... talk and do your usual business for about 4 hours... then look at the shield The inside of it if you have talked Much at all has little liquid marks on it... I was really surprised because I do t consider myself a spotty talker! hmmm, imagine how many germs are being spread just when you talk... masks will help hold all that and more from spreading into the air. Right now, I think wearing a mask is one way we can help keep from spreading all kinds of germs, airborne, and more. Is it really that hard to wear a mask for now? Just do it and see what happens. It won't be forever, just until we get through this time.

Distinguished Board, I am contacting you regarding the dire situation in our community at this time. Our COVID numbers are increasing, our medical staff is tired, sick and overworked, our teachers are very concerned. The SWDH site is great in giving us data. There is no doubt in all of our minds that the numbers are increasing!!! It is not rocket science. The deaths in Idaho for the 2018-2019 flu season was 58. Currently the Idaho COVID death number is 753. THIS IS NOT THE FLU. I understand why Gov. Little moved us back to a modified Stage 2. However his plan WILL NOT WORK, if people are not wearing their masks. I see signs all over in our community regarding the safeguards. Unfortunately, we live among people who will choose their personal discomfort over the protection of the community! I am appalled that no one will stand up to a community mask mandate!!! We know the case numbers are increasing, we know the deaths are increasing, however NO ONE has the courage to enforce these guidelines!! Please, hear me! My family, my friends, my coworkers, my community, THEY ARE DYING!!! I am begging for a mask mandate!!

## Q1

Public Comment\*

I am concerned with the number of positive Covid-19 cases in our county. Everywhere you look, you see the signs to help stop the spread by washing your hands frequently, not touching your face, putting at least a 6 foot distance between people, wearing a mask, etc. It seems so simple, yet people can't seem to follow these safety guidelines. We have mandated rules like wearing seatbelts, donning shirts and shoes if we want service in establishments, not using handheld cell phones while driving and people seem to accept these rules without complaint. Yet, you go downtown and into businesses and see people refusing to practice responsible safety measures to protect their loved ones and themselves from the Corona virus! If people would just wear their face masks, and wear them properly covering their nose and mouth, it would hinder the spread of covid-19. Our district would benefit from a mask mandate!!! Wouldn't you feel guilty knowing that refusal to wear a mask caused the illness, and Heaven forbid, the death of a loved one?

Greetings, My name is Pat Moylan. I am 64, and my husband, Bill, is 68. Both Bill and I have done the right thing during this pandemic: we've worn a mask, we do not make unnecessary trips, and we've not gathered with family and friends. In short, we've made huge sacrifices that others have not. It pains me to see that the number of infected folks, and deaths, have gone up after all our personal hard work. I implore the board to mandate masks. Perhaps a kindness campaign to spread the word. I wish you all a safe week and thank you for your service. ~PM

Since I don't know for sure what the meeting is about, I can only ask (BEG) that you please please please never mandate masks or any and all vaccinations. I am terrified that I will have to try to make a man wear a mask to enter our store when I'm there alone. I won't be able to do it because I'll be too afraid, and I don't want our business to be shut down because I'm afraid someone will hurt me. I don't ever wear a mask, as they make me panicky and short of breath. I do always keep my distance out of respect for others. Our store usually has one customer at a time, so it's very easy for us to maintain distance. Please protect your citizens from more unnecessary losses of freedom and let us as free American adults make our own health choices. You have done an AMAZING job so far, and you have my thanks from the bottom of my heart. I'm so grateful I get to live where the health district is run by brave freedom loving individuals. I realize you're probably taking a lot of pressure from both sides. Thank you for siding with freedom as you have so far.

### Q1

#### Public Comment\*

Everything has changed for all of us because of this pandemic. But we can all do are part to help get this pandemic under control. Since March our Mask-Up Ministry has been doing its part by sewing masks for free for everyone in need. We have sewed 3,500 because we truly believe that each mask we sew helps keep people safe, protected and saves lives. Mask wearing is of utmost importance if we truly care about life it self. It is a small sacrifice to wear a masks. We are living in uncertain times and it will take the help of each and everyone to do their part even if you don't like wearing a masks it is the most important thing you can do to show that we care and respect each other. The people that refuse to wear masks for what ever their reason is adds to the the pandemic instead of helping. That put others in danger and they should care enough about their own precious life. We need a mandate for everyone and I mean everyone to wear masks throughout our state. This pandemic effects all of us so everyone needs to be accountable and be part of the solution. If we don't have the same mandate for all then we are going to continue to live in uncertain times.

So many are doing the part so those that refuse to wear masks are making a statement that they just don't care. That is not acceptable. I value my life, the life of others and want all of us to live life to its fullest, so please make everyone do their part so we can all start be proected. Please make everyone do their part and please do not make just a few do their part while others go unaccountable for the lives they touch. Let's make masks wearing the most important thing you can do during this wicked pandemic. We all need to care about the future and do what ever it takes to save lives. Mask wearing helps stop the increase of the Coronavirus and it is everyone's responsibility.

Masks mandates, even when imperfectly followed, do work and will reduce the spread. As a teacher who wore a mask, I got the virus within weeks of the start of the school year because my students are almost entirely unmasked. I am still suffering from breathing problems 9 weeks later. I wish someone had required them to wear masks. Their "personal freedom" to spread the virus comes at a great cost to me! Show leadership enough to do the right thing, even if it's unpopular with some groups. Those protesting masks are not data-driven, they are ideologically motivated. Our health officials should make data-driven decisions.

As an Idaho citizen I believe that we should have some sort of mask mandate to simply save lives. We cannot let Ammon Bundy control our local government. Do not be afraid of him or his followers and we must be prudent and listen to science as it is presented to CDC and WHO.

## Q1

Public Comment\*

I am losing faith that this board cares about the desires of it's citizens and the rule of law. I don't remember reading in the founding documents of our country about losing all your rights in a health crisis. I know people are scared but even the CDC admits that covid is transmitted whether or not a face mask is used. I am a caring Idaho citizen but the only people I've known who have had bad covid reactions are friends that are forced to wear a mask at work. In all 5 cases their spouses only had mild cold symptoms. Please restrain yourselves from mandating something that is not lawful. Mandate all you want but I will never wear a mask.

## Q1

Public Comment\*

No mask mandate should even be discussed. The number of double standards with this covid crap are over the top. If 6 feet works, then why masks? If masks work why the continued lockdowns? If any of this worked why would states who have had all these "rules" still have an increasing number of cases? Please, leave the people of idaho alone to make informed decisions for their own families and stop with all the political garbage!

## Q1

Public Comment\*

No mask mandate. Fashion masks don't work and medical masks only work in sterilized environments or if you are changing them every 20 minutes or so. People touching their masks and touching everything else is what is causing this to spread. Masks are gross and I see them all over the ground and people are gross with them. It's making people less friendly and afraid of each other. It's inducing anxiety and taking the joy away from life. We have a case-demic not a pandemic. We've got to stop the fearmongering and propaganda. I reject this new normal.

Please! Implement mask mandates! You have just closed down my childcare facility because they had ONE family have cases, now impacting me and my family who are both essential as we have no other childcare yet you can't do what is right in front of you and require masks, which are known to prevent this. It's unfortunate that not enough people heed your recommendations but that's the facts as cases are piling up and there is no where that is safe anymore.

### Q1

Public Comment\*

Dear SWDH Board,

Covid numbers are rising. Hospitals are trying to cope the best they can with the influx of ever increasing Covid patients. Healthcare workers are begging for something to be done to stop the spread. It is spiraling out of control. Educating the public has done nothing to stop the spread. You, the SWDH Board, can do something to help this health crisis. Please pass a mask mandate. It has been scientifically proven that masks help curtail the spread of Covid. Please respect our healthcare workers and the people in your district who are trying to do their part. Many people who are in favor of a mask mandate consider it unsafe to go to your meetings due to the unmasked vocal minority who like to attend your meetings and stir the pot with untrue facts. As a health board, please do your part and consider the safety of your district.

### Q1

Public Comment\*

Please consider a mask mandate for all and consequences for non-compliance for people and businesses. Several restaurants, bars, etc. are not following guidelines, why would they (or people) when they know nothing will happen. The only way Idaho is going to bring their COVID numbers down is with strict protocols and enforcement. There are to many people who will not do the "right thing" , they do not care, they've made their minds up COVID numbers are fake and masks are a political ploy. Our medical staff, hospitals as well as teachers are worn out from fighting this battle.

It's up to you to help Idahoans survive during this Pandemic. Our governor has proven he will not do it.

Chris

### Q1

Public Comment\*

I do not want the mask mandate to go through for several reasons. One big reason is because I love Twin Falls. I love the small businesses down main street and the friendly faces throughout this town. I fear what a mask mandate will do to us. Businesses will lose money during a crucial time of the year. Winter brings in money for presents and celebrations. Many people will resort to online shopping, instead of masking up for down town shops. Businesses will close and families will be devastated. I also fear people will continue to grow divided among each other. People already are growing less social and more distant. The mask mandate is also unconstitutional. It takes away our liberty and our right to choose. Many people have been masking up already, in grocery stores, while walking and even at restaurants. Not everyone can wear a mask though. We have people with asthma, PTSD and the hearing impaired. We need to respect these people and not restrict their access to places. They struggle already, when they need to go to the doctor. Many are scared to see a doctor right now. We are loosing our faith in the medical field, because they want to enforce tyrannical laws on us. We just want to be free to choose what's right for us.

## Q1

### Public Comment\*

Dear Southwest District Health Board:

I am writing this in support of a mask mandate to slow and prevent further COVID-19 cases that are surging and deaths that seem to have no slowing down. Many of the states that have not taken measures to contain the pandemic are now severely impacting the health systems, hospitals, staff that what appears to be in a few weeks, if nothing slows the virus, it will be devastating to the general public to receive medical attention. Several hospitals are full of COVID patients and that appears to be rising at exponential rate. The next step to curb this virus will be a full lockdown of businesses, travel which no one wants but will be necessary. In hindsight, if proper measures would have been taken early on, this pandemic would have been contained and the public getting back to normal months ago. States and local agencies need to coordinate to have a consistent plan of action so the public can be protected. This virus is effecting many of my friends and relatives. It is so grievous that you have not enacted measures to combat the virus, that doing nothing will drag this out for a long time to come, please do the right thing and listen to the facts instead of the vocal few. This is not an impact on any personal rights of those who disagree with a mandate, its protecting my health and safety as well as others that should be first and foremost of your position in the community.

## Q1

### Public Comment\*

This mask mandate is hurting our child mentally and physically. This mass hysteria and forced violation of our civil rights is damaging the development of our children. Their ability to exist as children is being violated. Children who suffer from social anxiety require social interaction to be normal are being being forced to go without. By not letting our children go back to school, you are hurting them mentally. You are stealing their right to a good education, their basic human rights to interact with other people, and the discipline that they require to be successful as an adult. Our kids need to be in school 5 days a week. 2 days of instruction is not enough to be helpful or even educational. Our children will suffer due to the lack of education that they are being given. Stop this madness and send our children back to school where they belong.

### Q1

Public Comment\*

I respectfully ask that a mask mandate be required and implemented asap in this health district until such time as the pandemic numbers are reduced. With ICU and hospital facilities at capacity with COVID patients, and staffing becoming an ever increasing issue, it is imperative to bring the number of cases under control. Looking back and regretting will not remedy any who are certain to die even from nonCOVID health crises or those who will suffer months of health issues because the system was overwhelmed. This is not a political issue. This is a public health issue. Eight months of this pandemic have provided ample proof that areas where masks are mandated, accompanied with social distance restrictions and hand washing have been able to reopen schools and businesses safely. Do this for the good of our entire community, including the vocal minority who will ultimately benefit from the proven success of such a mandate.

It's time for the Board of Health to step up and lead by providing more than guidance. It's painfully obvious that your indifference and inaction towards COVID-19 isn't working. Numbers continue to climb yet this board does nothing but kick the local control can down the road. It's past time to mandate masks, to take a hard stance on bars and restaurants, to close school buildings, and to support the health and wellness of our communities. Step up or step down and let someone else take your place on the board. Listen to the medical professionals and public health experts and follow their guidance. Tim Rigsby, Nampa, ID

**Q1**

Public Comment\*

Could the County Health Department PLEASE CLARIFY the following information about the data gathered:  
CONTRACT TRACING / PRIVACY  
INCREASED TESTING and INCREASED CONTACT TRACING.

Contact tracing is one more way to take away people's rights, privacy, and freedom. When the coronavirus has been long gone, history has shown that exceptions to civil liberties protections made in a time of crisis, often persist much longer than the crisis itself. Contact tracing is one we are not willing to compromise on.

How is tracking and testing helpful, when someone can literally be tested one day and encounter the virus the next? It's useless.

Contact tracing will progress by those who test positive offering the contact information for their contacts, including email address, telephone number, and physical address? Will this be stored in a database? How do we ensure that this data will be safeguarded? COVID data should NOT be hosted overseas, as the hosting country may not have 4th amendment rights that protect rights to privacy, as designated under the U.S. Constitution.

What guarantees do we have that a citizen's health and location data will not be licensed, sold, or breached in the future? Insider information leakage and it's very difficult to get around. Privacy breaches, discrimination, a never-ending surveillance, violating people's rights. By waiving warrant needs, data can be accessed at any place, any time, with no boundaries. All it takes is one leakage and the damage is done.

The government must show their work (public information). Data must show the rationale for the continuation of current data collection processes, otherwise, the program must be closed. There must be a Right of Access must be included. We must also have public access regarding what information has been collected and with whom it has been shared.

FALSE POSITIVES = FALTY DATA = FALSE QUARANTINE (aka imprisonment)

If contact tracing has a high false-positive rate, especially for a high-prevalence disease, you might as well just alert everyone.

With the anticipation of increased testing of people who show NO SYMPTOMS -What measures are in place to account for the high % of false positives? If a person TESTS and receives a false positive - proven by a subsequent test - is the original \*inaccurate\* data of the false-positive REMOVED from the records or DOES IT REMAIN to skew the data?

How will additional contract tracing create forced quarantine? How do we guarantee that our data will not be falsified? For example, if someone doesn't like us, will they be able to claim they were in contact with us? Forcing us from being able to go to work and putting our families at risk financially.

INCREASED MASK USAGE = INCREASE CASES

Has ANYONE at the health district OVERLAID the timeline for mask usages with the positive cases. IS THERE A CORRELATION between the two? According to other states and countries mask mandates DID NOTHING to decrease cases.

Has the mask requirements by businesses DECREASED deaths?

According to the charts the deaths remain steady.

PANDEMIC AMOUNTS OF STATEWIDE DEATHS???

Can you please explain the LACK of increase in overall deaths and how this can be labeled a PANDEMIC???

according to the CDC data <https://data.cdc.gov/NCHS/Weekly-Counts-of-Deaths-by-State-and-Select-Causes/muzy-jte6/data>

From last year to this there is NO SIGNIFICANT INCREASE in overall deaths.

### Q1

Public Comment\*

Dear sirs, the idea of quarantining the healthy goes against everything I love about this country and the state of Idaho. I believe if the choice is left to the public they would be more willing to go out of their way to protect the elderly and immune compromised. Mandates invite civil disobedience and unrest at a time when our country needs a good example of neighborly generosity and caring. Please remember that Idaho has long been a freedom loving state and leave personal health choices to the public to decide for themselves!

### Q1

Public Comment\*

I would appreciate it if you would stop adding probable numbers to the count. They are not confirmed and do no good. Also, stop all contact tracing. It is not doing anything to "stop the spread". Keeping healthy out of work and school is ridiculous. It is not comprehensive, is far too delayed, and I find it abhorrent to ask people to tattle on their friends, family members, and co-workers. Just stop. Let people assess the risk on their own and make choices for their own lives. Enough is enough.

Please BACK off!!! We don't need any further mandates. We, the people, are sick to death of the over reach by govt into our personal lives. I know you have your "statistics" on the virus but you will NEVER admit there are just as many stats that do not support further mandates. You never look at the whole picture. It doesn't fit the narrative!! Further mandates are going to result in increased resistance!! Please back off!! PEOPLE ARE FED UP!!! I'm ready to move to S Dakota!

## Q1

Public Comment\*

If you "follow the science" the indisputable truth is that masks simply do not work - period to contain or reduce the incidence of Covid 19. And then of course all such mandates are clearly unconstitutional. We can no longer trust the government or the healthcare industrial complex to tell the truth and certainly not the media. It would be great if you obeyed your oath to uphold the State and Federal Constitution.

You have no legal authority to take away our freedoms of choice or the pursuit of happiness. There is no sickness or disease that the constitution bows to, to give you the right to take away our freedoms to conduct business, how we conduct business, or what any said business has to demand from customers!

You are a committee to assess and suggest and have no legal authority to demand from citizens how they should live. So, you are welcome to discuss, assess and recommend but that is it! You are not the law, nobody has voted for you and you have no authority.

## Q1

Public Comment\*

We are tired of living in a nanny state where the governor and the health department believe they have can dictate how we live our lives--whether we can go to work or not or whether we can visit loved ones or whether we can shop mask free. We do not need a vaccine for a virus with a 99,97% survival rate. We have immune systems. We are not supposed to be living in Nazi Germany, but that's what it's become. Two months to flatten the curve has become put your entire lives on hold until there's a vaccine. The PCR test is faulty and too sensitive and detects fragments of a dead virus, and you're requiring people to get tested even though they are healthy which continues the casademic and a faulty test with too many false positives is what we are basing decisions affecting people's lives. Even Fauci says a virus cannot be detected in the levels we are using between 35 and 40 cycles (the same guy who let us know how useless masks are in May). And this is what we're using to shut down people's livelihoods and keep kids out of school and cancel sports and living. For those at risk, they should stay home if they're afraid they're at risk. The rest of us have lives to live and we will all be bankrupt and homeless if we continue in lockdowns. You should be publishing the suicide rate, and the divorce rate, and the drug and alcohol abuse, and the number of businesses that have closed never to reopen, and the unemployment rate. We have not saved any lives nor will the vaccine save any lives. We do not need a vaccine with aborted fetal cells and other toxins when we have therapeutics that although they are being censored do work. No more masks--no more social distancing--we want to live free like the people of South Dakota and Florida and even our own Adams County instead of turning Idaho into Communist China. This is a crime against humanity.

### Q1

Public Comment\*

I have watched your meetings for months now and have commented nearly every time. Please, listen to the medical community. Listen to the doctors, and PLEASE follow their advice. As the HEALTH department, everyone is looking to YOU to make the tough decisions, as you are the ones with the best medical advice and the knowledge about our district as it pertains to health in your hands. You yourselves may not be health experts, but you have health experts right in front of you today. Please listen to them and follow their advice.

If you had experts telling you that the water was unsafe and told you how to make it safer, you would listen. In this case, you have experts telling you that masks and social distancing work and they are asking you to make this call. Please do.

You've given the people in our communities ample time to come to the realization that they must be responsible for themselves and to protect others. You've asked them, you've recommended they wear masks, but they aren't listening. PLEASE give them more reasons to comply. There is certainly no easy way to go about enforcement, but at this point, anything is better than nothing. Give the businesses something to use to help enforce masks. Make it harder for people to gather in groups indoors. Please use the power of your position to help our community and hospitals to get things under control before it gets even worse. We are depending on you, the Board of Health, to keep our communities healthy.

Jaci Johnson  
Nampa, ID

### Q1

Public Comment\*

I am requesting there be no more mandates of any sort. No masks. No distancing. No vaccines mandated. Let the people be free to govern themselves and take responsibility. The data and science does not support any of these mandates and quite frankly pushing more on the public will subject this board to legal repercussions. We are holding you all responsible for those suffering not because of a virus but because of these mandates and irrational lockdowns and rules. This is tyranny and borderline communist. NO MORE MANDATES.

## Q1

Public Comment\*

As a citizen of Twin Falls County and a local business owner, I do not want or condone a mandated mask policy for a virus that is highly survivable. Sencondly, there is no solid facts that mask mandates are effective, in fact they are quite the opposite from what I can find. Also why not teach people how to increase their immune systems strength? I feel for people and their families who have lost loved ones during this time, but unfortunately they were susceptible to any illness regardless of covid! CDC stats do not show covid as this scary killer either. People are dying from coronary disease more still and alzheimers than covid! Why not ban fast food joints and send funding to find a alzheimers treatment? Car accidents are causing higher fatalities than covid. Lastly, we are seeing an increase in tests due to cold and flue season, NOT because covid is on the rise. A St. Lukes employee gave me that information but due to fear of retaliation from her employers I will not release her name. Speaking of st. lukes, our hospital has had ample time to prepare since March for a supposed increase or second wave, why didn't they? Also why did our county and city sign a 25 year non compete clause allowing st. Lukes to monopolize the medical industry in our area?I dont see this as a safety issue but a money making issue, I support safety when there is facts to go along with it. This covid pandemic has been severely misrepresented from the start and I dont believe that it is as bad as was led to believe based on how our leaders are handling it. Dr. Fauchi made comments recently that sound tyrannical in nature and not of concern. Which brings me to my next point. Our local governments have not passed one so why are you trying to circumvent our elected leadership? Its like having mom say no so you run to ask dad? Your mandate will take away the rights of people to have a choice for their own person and safety which is protected by the constitution, and our bodies, which you DON'T have control over either and as such violates our constitutional rights. This is no different to me when it concerns abortions. I disagree strongly with abortions but its not up to me what choice another individual makes. This shouldn't be up to you either. Pass or fail I will NOT comply.

## Q1

### Public Comment\*

My name is Steve Marin and I am a constituent living at 2442 Homestead Street. Twin Falls, Idaho 83301. I highly urge you to vote no. I strongly feel that a mask mandate is a government overreach into our lives and erodes our liberties and freedoms, that we are entitled to. It is the job of the government and in this case the local city government to govern the city not to intrude in our personal lives.

Furthermore, I truly believe none of us know, including the medical community the long-term effects that prolonged mass wearing will or can cause. We don't need our government or elected officials telling us how to be safe.

Thank you for your time and I truly hope that this mandate does not get passed.

### Q1

#### Public Comment\*

I am strongly opposed to forced mask mandates for, many reasons. Below are three.

1) There is a significant number of professional medical journal articles indicating that the wearing of masks by healthy (including asymptomatic and pre-symptomatic) individuals has very little impact on transmission of this or any other virus; there is admittedly some evidence that they do have limited benefit when worn by someone who is actively ill (symptomatic). Please read the studies from professional medical journals (not media, politicians, or activists) listed in the document linked below.

2) Without substantial scientific/medical evidence to support forced action, (there are tens of thousands of medical professionals on both sides of this issue) and without involving the legislature in the decision-making process, governors and their appointed health boards are trespassing on our Constitutionally-guaranteed freedoms.

3) It is very disconcerting to see such a rampant disregard for citizens of this nation who have legitimate disabilities, whether psychologically driven such as PTSD or medical conditions, being forced into wearing a mask or face shield and being deprived of the protections that were granted under the Americans with Disabilities Act. Violations of the ADA have long been touted as taboo, and legally prosecutable, until this year.

I ask you to please read the articles by medical professionals listed in the attached document, or at minimum read the included quotes. Then I ask you to encourage the population of this district, state, country to be careful, cautious as they go about their lives and finally, refuse to issue a mask/shield mandate.

### Q1

#### Public Comment\*

Recent information from the CDC and the WHO shows that the majority of people that were diagnosed with Covid19 wore a mask all of the time or most of the time in the 2 weeks prior to diagnosis. This should make everyone question if masks are part of the problem. Once more of the masks mandates went in place and more mask shaming occurred, resulting in more mask wearing, the numbers increased as well even before cold and flu season. This also makes me wonder if masks are part of the problem. If masks can't be proven effective against covid19, people should not be shamed for not wearing, nor should mandates be put in place.

Panic buying the result of perpetual fear mongering from those in the medical field admin, media, & public servants.  
Ridiculously overblown.  
Sincerely, One Fed Up RN!
